Exterior 2023

***Natural
Coating Systems***
for exterior

with detailed care instructions

Dear customer

**Would you like to paint, beautify or maintain your wood?
The coating should dry fast, be easily applied and last for a long
time? Then SAICOS always has the right product for you.**

When developing our products we have taken all your wishes and processing aids into account so that you can treat your wood as simple as possible.

Via a QR-Code directly on the product itself or at the shelf in a specialist shop you can either click on the technical data sheet or a brand new video with step-by-step explanations.
The QR-codes functions are: helping with the actual buying decision at the shelf, watching the product video at home or as a virtual instruction manual on your 'building site'.

Curious? Discover more on the following pages.

Thank you very much for your trust.

WPC Care Oil

Can Size	Item Number
0,125 L	(Art.-Nr.) 101
0,75 L	(Art.-Nr.) 301
2,5 L	(Art.-Nr.) 501

SAICOS WPC Care Oil is a transparent, open-porous coating for the maintenance of weathered and roughened WPC surfaces.

The wood – plastic composite materials are protected sustainably from fading and discolouring.

SAICOS WPC Oil Care is suitable for all components of WPC.

We recommend an intense cleaning with SAICOS Cleaner for Wood-Plastic-Composite (item Number 8123) prior coating.

Wood Stain H₂O

Information

protects and cares

weatherproof

1 L = approx. 9 m² (2 coats)

Transparent water-based wood stain for exterior wood with particularly high weather resistance. Provides a beautiful, natural and decorative colouring. The open-pored stain allows the wood to breathe. It is extremely durable and water- and dirt repellent. The swelling and shrinkage of the wood is reduced.

SAICOS Wood Stain H₂O is ideal for exterior wood, penetrates deeply into the wood and keeps it healthy and elastic. The coating protects the surface against weathering, moisture, mould and fungal attack. Colour pigments with high UV resistance (except colourless) ensure the natural beauty of the wood.

SAICOS Wood Stain H₂O bonds permanently with the wood - no sanding in case of renovation, even after years.

0,75 L	7050 301
2,5 L	7050 501
10 L	7050 701

Do your white panels look like a Dalmatian's fur after a short time?

We have the solution against penetrating knots that can quickly spoil the beautiful appearance: *SAICOS Primer White*.

The primer ensures a perfectly even surface and successfully covers unwanted knots and wood discolourations.

SAICOS Primer White significantly increases the durability of the wood thanks to its water-repellent properties that protect the surface.

This is not a stand-alone finish.
We recommend using two opaque coats of *SAICOS Bel Air H₂O Garden- and cladding colour* as final coat.

For natural beautiful wood

with strong dirt and water repellent properties

0,75 L	(Item Number) 301
2,5 L	(Item Number) 501
10 L	(Item Number) 701

Wood that is exposed to sunlight and UV radiation will weather and become noticeably greyer.

Thanks to long-term UV protection, you can counter this process and permanently preserve the beauty of your wood.

The water-repellent and moisture-regulating properties of the SAICOS UV Protective Wood Finish Exterior also prevent additional swelling and shrinking of the wood.

Applicable as either (double) coat on its own for a 'natural' look, or as satin matt final coat on top of all SAICOS exterior finishes.

Effect Wood Stain

Can Size	Item Number
0,125 L	(Item Number) 101
0,75 L	(Item Number) 301
2,5 L	(Item Number) 501
10 L	(Item Number) 701

Give your **roughly sawn wood** an elegant, slightly metallic effect.

The finish is open-porous and highly resistant against all kinds of weather effects and mechanical damage, bonds permanently to the wood.

Greying Wood Stain

Can Size	Item Number
0,125 L	(Item Number) 101
0,75 L	(Item Number) 301
2,5 L	(Item Number) 501
10 L	(Item Number) 701

SAICOS Greying Wood Stain naturally protects your wood facades and garden woods against uneven and patchy greying.

Colour pigments with high UV-resistance ensure permanent beauty and a flowing transition to natural greying.

The natural oils of SAICOS Greying Wood Stain penetrate deeply into the wood to protect it from the inside and keep it elastic and highly durable.

SAICOS Greying Wood Stain is suitable for smooth and sawn wood and dries quickly.

One coat is sufficient – the rest is done by nature.

Care instructions

Thorough cleaning of wooden decking

Low in solvent, chlorine-free, formaldehyde-free, without bleach.

Decking Cleaner Thorough cleaning of wooden decking

Fields of application:

Concentrate for the simple and thorough cleaning especially of wooden decking.
Low in solvent, chlorine-free, formaldehyde-free, without bleach.

Recommended application:

- » Remove loose dirt from the decking and afterwards moisten the surface.

- » Mix SAICOS Decking Cleaner Concentrate 1:5 with water. (e. g. 1 liter concentrate with 5 liters of water) and apply dilution evenly with SAICOS Floor Brush on the wooden decking (do not leave puddles on surface).

- » Leave to act for 5 - 20 min.
- » Re-treat spots dried during this time.
- » Then thoroughly clean the decking with the SAICOS Cleaning brush for wooden deckings.
- » Rinse 2-3 times with clear water.

- » If there are any remaining dirty areas, simply repeat the process above.
- » After complete drying the surface can be coated with SAICOS Decking Oil H₂O or SAICOS Special Wood Oil (please refer to the technical data sheet).

Thorough cleaning of WPC terraces

free of bleach, especially for Wood-Plastic-Composite

Cleaner for Wood-Plastic-Composite (WPC)
cleans quickly and intensively
terraces made from wood / plastic composite

Fields of application:

For the simple and thorough cleaning especially of WPC (Wood-Plastic-Composite) decking.

Recommended application:

- » Dilute the concentrate **1:10** with water (e.g. 0,5 l with 5 l water) and spread evenly on the WPC surface using the *SAICOS Floor Brush*.
- » Do not leave puddles.

- » Allow to absorb for **5 – 20** minutes.
- » Re-treat dried areas during this time.

- » Remove dissolved dirt with wiper, grooves may be cleaned with *SAICOS Cleaning brush* for wooden deckings.
- » Wipe afterwards 2–3 times with clear water.

- » If there are any remaining dirty areas, simply repeat the process above.
- » Please consider our current technical data sheets.

Removal of unsightly greying

especially recommended for horizontal surfaces

Wood Brightener Concentrate
*brightens natural exterior woods
without sanding*

Fields of application:

Garden furniture, wood decking and terraces, plant boxes, wooden grilles on balconies, wooden claddings etc. made of untreated wood.

Especially recommended for **horizontal surfaces** such as terraces.

Recommended application:

- » Remove coarse dirt (sweep or brush off).
- » Protect metal (e.g. fittings) through masking, cover plants with foil, protect clothing.
- » Moisten the surfaces to be treated.

- » Dilute the concentrate **1:5** with water, depending on the degree of greying.
- » Use undiluted against stubborn infestation.

- » Apply thickly with a garden sprayer, watering can or a brush.
- » Allow to absorb for **15 – 30 minutes**.

- » Wash off with *SAICOS Cleaning brush* for wooden deckings and lots of water. Rinse thoroughly with water.
- » If there are any remaining grey areas, simply repeat the process above.
- » Please consider our current technical data sheets.

Removal of unsightly greying

especially recommended for vertical surfaces

Wood Brightener Power-Gel
*brightens natural exterior woods
without sanding*

Fields of application:

Garden furniture, wood decking and terraces, plant boxes, wooden grilles on balconies, wooden claddings etc. made of untreated wood.

Especially recommended for **vertical surfaces** such as fences or sight protection (e.g. balconies) etc.

Recommended application:

- » Remove coarse dirt (sweep or brush off).
- » Protect metal (e.g. fittings) through masking, cover plants with foil, protect clothing.

- » SAICOS Wood Brightener Power-Gel is ready to use - do not dilute.
- » Apply thickly with the SAICOS Floor Brush following the wood graining.
- » Allow to absorb for **20 minutes**.

- » Wash off with SAICOS Cleaning brush for wooden deckings and lots of water. Rinse thoroughly with water.

- » If there are any remaining grey areas, simply repeat the process above.
- » Please consider our current technical data sheets.

FAQ

You ask, we answer!

» ***I have wood with a high proportion of knots. How can I reduce the knots coming through?***

For a perfectly covering coat, *SAICOS Primer White* is available as a primer. It covers knots and wood discolouration. For the final coat we recommend *SAICOS Bel Air H₂O Garden and cladding colour* or our *SAICOS House & Garden Colour*.

» ***How can I protect the cut edges of my wooden terrace from water?***

To protect cut and end edges, we recommend our *SAICOS End-Grain Sealing Wax*. This serves to prevent hairline cracks and prevents the bleeding of wood ingredients. It is dirt and water repellent and is suitable for all exterior wood.

» ***Does white SAICOS House & Garden paint yellow in light/dark areas such as conservatories or roof shelters?***

No. *SAICOS House & Garden Colour* was specially developed for exterior wood. Colour pigments with high UV resistance ensure the lasting beauty of the paint. At certain intervals, a further coat should be applied after prior cleaning.

» ***Do I also have to impregnate hardwood outdoors?***

Impregnation is always advisable. We recommend *SAICOS Universal Impregnation*.

» ***Can I paint SAICOS Bel Air H₂O on a surface treated with SAICOS House & Garden Colour?***

Yes, this is possible after first thoroughly sanding the surface.

» ***Can I paint SAICOS House & Garden Colour on a Bel Air H₂O surface?***

Yes, this is also possible without sanding. Please clean the surface thoroughly before application.

Our application advice is given to the best of our knowledge and based on experiments, but should only be treated as a non-binding guide. You must still check that the products delivered are suitable for the intended purpose. As we have no control over the application and processing of our products, the user bears full responsibility. The previous product informations shall be deemed invalid following publication of a new brochure. Changes reserved. All images of our product colour palettes are non-binding and may deviate from the original colour.

For more information, please read our current technical data sheets. The protection of your personal data is very important to us. You can find our privacy policy on www.saicos.de.

Care instructions for sealed parquet and wood flooring in accordance with DIN 18356. To ensure a good atmosphere in the room and to preserve your wood floor, we recommend a room temperature of 20-25 °C and a relative humidity of 55-60%. For more information, please read our current technical data sheets.
