***Natural
Coating Systems***
for interior

with detailed care instructions

Dear customer

**Would you like to paint, beautify or maintain your wood?
The coating should dry fast, be easily applied and last for a long
time? Then SAICOS always has the right product for you.**

When developing our products we have taken all your wishes and processing aids into account so that you can treat your wood as simple as possible.

Via a QR-Code directly on the product itself or at the shelf in a specialist shop you can either click on the technical data sheet or a video with step-by-step explanations. The QR-codes functions are: helping with the actual buying decision at the shelf, watching the product video at home or as a virtual instruction manual on your 'building site'.

For the new year we've taken all your wishes into account and expand our coating product range.

Curious? Discover more on the following pages.

Thank you very much for your trust.

For natural, permanently beautiful surfaces that are easy to maintain, we recommend our *SAICOS Premium Hardwax-Oil*.

The natural ingredients of the hardwax-oil penetrate deeply into the pores of the wood and give the surface a wonderful touch.

Surfaces coated with *SAICOS Premium Hardwax-Oil* can be sanded and partially re-oiled at any time.

No visible contact points and all naturally based, suitable for all wood surfaces.

Suitable tools such as the Oil/Wax-Roller, Universal-Roller, etc. can be found on page 26.

The Premium Hardwax-Oil System

3 additives that are particularly designed for your needs

Additive UV Protection (3242)

Natural discoloration is a direct result of the wood's exposure to light. The colourless *Premium Hardwax-Oil* including *Additive UV Protection* reduces the natural discoloration of the wood significantly.

Additive Anti-Slip R10 (3240)

We can fulfill a big market demand with the colourless *Premium Hardwax-Oil* including *Additive Anti-Slip*. The final coating achieves the certified anti-slip property R10.

Additive Hardener 2K (3243)

With the *Additive Hardener 2K*, the colourless *SAICOS Premium Hardwax-Oil* dries quicker even under difficult working conditions e.g. high air humidity.

In general, coated surfaces can be walked on earlier and have an improved abrasion hardness.

The additive can also be used for the Ecoline Oil Ground Coat and Ecoline Hardwax-Oil (3600Eco).

The new Single Top Oil - System

The new Single Top Oil - System

for natural, beautiful surfaces

The new Single Top Oil system

The new *Single Top Oil (2K)* system is a high-quality one-layer system for private living areas. Adding the *Single Top Hardener 2K* results in a high-quality, easy-care surface. For an optional additional protection, we offer the *Single Top Oil Care* that can be applied as an initial care.

Information

Additive Single Top Hardener 2K

Can Size	Item Number
for 0,375 L	4643 055
for 0,75 L	4643 157

Simply pour into the *Single Top Oil (2K)*, stir well and you are ready to go!

The quantity of the *Single Top Hardener 2K* is matched to the respective tin size of the *Single Top Oil (2K)*.

Single Top Oil (2K) must always be used in combination with Single Top Hardener 2K.

0,75 L	3620Eco 300
2,5 L	3620Eco 500
10 L	3620Eco 700

Ecoline Hardwax-Oil 2.0 combines quality and ecology.

Based on natural oils and waxes, it creates a natural and durable surface and is especially suitable for heavily used wood surfaces.

The product is applied by spatula and afterwards buffed with white or beige pad. The surface is slip-resistant R9, healthy living and open-pored.

It also allows an easy maintenance with aligned SAICOS care products.

10 L	3600Eco 700

If you want to achieve permanently beautiful, natural surfaces that are easy to care, whilst avoiding solvents, we recommend our *Ecoline Hardwax-Oil*.

The natural ingredients of the hardwax-oil penetrate deeply into the pores of the wood and give the surface a wonderful haptic and satin matt appearance.

It dries quickly, giving you a high-class surface in just one day.

Surfaces coated with *Ecoline Hardwax-Oil* can be sanded and partially re-oiled at any time. No visible contact points and all naturally based, suitable for all wood surfaces.

Also usable with Hardener 2K (3243).

Ecoline Oil Ground Coat

Can Size	Item Number
0,125 L	(Item Number) 100
0,75 L	(Item Number) 300
2,5 L	(Item Number) 500

Highlight the beauty of your wood with pure natural oil - low-solvent. High-pigmented, for professional usage.

The Ecoline Oil Ground Coat has been especially developed for wood, cork and bamboo floors, as well as particularly heavily used pieces of furniture.

It combines an exceptional good abrasion resistance with high durability and emphasises the natural beauty of your wood.

For the final coat, we recommend:

- » SAICOS Hardwax-Oils or
- » Ecoline MultiTop^{plus} Lacquer system

Also usable with Hardener 2K (3243).

Hardener 2K (9908Eco)

With the Additive Hardener 2K the Ecoline MultiTop dries faster, especially under difficult conditions such as high humidity. Generally, the surface has a higher abrasion resistance and can be walked on earlier.

Information

UV Protection (9914Eco)

Significantly reduces the natural colour changes of wood.

Information

Extra White (9915Eco)

For an extra-white floor, we recommend combining with Ecoline Oil Ground Coat 3408Eco.

Information

Slip Resistant 'R10' (9916Eco)

A major requirement for objects can be fulfilled with the Ecoline MultiTop Slip Resistant additive. Particularly suitable for stairs, stairheads or in objects like old people's homes.

Information

Delayer 'Slow Down' (9919Eco)

Extends the workability of the lacquer, especially under critical site conditions with high temperatures and low humidity.

Information

Pitch Black (9918Eco)

One can accomplish a black surface with extraordinary effect. The structure of the wood and the laying system is still visible.

Information

Pure (9933Eco)

When rolling the Ecoline MultiTop a perfectly protected wood surface can be achieved that looks as if untreated.

Special solutions

to complete our lacquer system

Information

Ecoline Ground Coat 'Speed' - colourless

Can Size	Item Number
5 l	9912Eco 610

Ecoline Ground Coat 'Speed' is a product especially developed for wood, bamboo and all common types of wood.

The primer is healthy for living, breathable and complies with the VOC guidelines 2010. It is easy to apply and can be **overpainted after only 60 minutes**.

With a firing effect.

Ecoline Crack-Filler - colourless

Can Size	Item Number
5 l	0970 002Eco 610

Ecoline Crack-Filler is water-based for simply producing grout from grinding dust.

It dries extremely quickly and has impressive sanding properties.

Suitable for all SAICOS floor primers and coatings, as well as all common wood types that are dry and uncoated.

Application quantity: 80 - 100 g/m².

Our alternative for biocide wood protection

particularly recommended for wood in moist rooms

Information

protection from moisture

1 l = approx. 8 m² (1 coat)

Wood Impregnation biocide-free

Can Size	Item Number
0,125 L	9000 100
0,75 L	9000 300
2,5 L	9000 500
10 L	9000 700
25 L	9000 800

SAICOS Wood Impregnation biocide-free is totally free of organic biocides and therefore particularly harmless.

It provides natural protection against moisture damage, penetrates deeply into the wood and keeps it elastic. The wood can still breath, allowing the moisture to escape.

Particularly recommended for treating woods in moist rooms like bathrooms and kitchens, which are at risk of blue stain. The alternative to biocide or fungal wood protection treatments.

This is not a stand-alone finish. A final coat must be applied within 1 week. We recommend SAICOS Color Wax or SAICOS Premium Hardwax-Oil.

Ground Oil Extra Thin

Can Size	Item Number
0,125 L	(Item Number) 100
0,75 L	(Item Number) 300
2,5 L	(Item Number) 500
10 L	(Item Number) 700
25 L	(Item Number) 800

SAICOS Ground Oil Extra Thin is an open-pored primer that penetrates deeply and easily and is recommended as first coat for exotic and hardwoods.

Floors treated with SAICOS Ground Oil Extra Thin and SAICOS Premium Hardwax-Oil repel dirt and water and are extremely resistant. Moisture cannot harm this open-pored coating.

For the final coat we recommend:

» SAICOS Premium Hardwax-Oil

Waterborne 2K PU-coating

to renovate PVC, Linoleum and design floors

restoration instead of exchange

DIN 68861 – Part 1

DIBt approval Z-157.20-208*

1 L = 10 m² (1 coat)

*The DIBt approval is also effective in combination with each of the supplements.

2K PU Elastic

Can Size	Item Number
4,55 L	9600 618

Waterborne 2K PU sealer based on polyurethane to renovate surface protection and to be used as a new coating on design floors, PVC and Linoleum.

This hard-wearing coating offers a very good adhesion as well as high elasticity. It is highly resilient and abrasion-resistant and offers a better resistance against common household disinfectants.

Due to its excellent leveling SAICOS 2K PU Elastic is easy and safe to use. The high solid content reduces dirt-attraction and reduces maintenance efforts.

Can only be used in combination with Hardener 2K (9608). This has to be ordered separately.

9600
Matt
colourless

Waterborne 2K PU-coating

individual additives and cleaning products

Information

Hardener 2K (9608)

By adding the *Hardener 2K* the surfaces dries quicker – especially under difficult conditions e.g. high humidity.

2K PU Elastic must always be used in combination with Hardener 2K.

Anti-Slip R10 (9616)

The supplement *Anti Slip R10* fulfills a common request for commercial projects. Especially suitable for staircases, projects or surfaces with higher anti-slip properties.

Information

Information

Delayer (9619)

Prolongs the workability of the *2K PU Elastic*. Especially suitable for critical conditions on-site (higher temperatures and low humidity).

All possible combinations at a glance:

	2K PU Elastic	Anti-Slip R10	Delayer
Hardener 2K	✓	✓	✓
Anti-Slip R10	✓		✓
Delayer	✓	✓	

Information

Basic Cleaner Concentrate

Can Size	Item Number
1 L	8124 409

SAICOS *Basic Cleaner* for design flooring, PVC & linoleum is a concentrated intense cleaner for all water-resistant, alkali-sensitive floor coverings. Especially for design floors, PVC and linoleum. Also suitable for natural- or artificial stone, limestone, clay, brick and natural rubber. Also removes strongest dirt.

The use saves time due to its short exposure time. Loosened dirt is easy to remove.

Also suitable for cleaning machines.

We recommend to use a green pad (0950 599).

*for all water-resistant,
alkali-sensitive floor coverings*

removes hardest coatings

New life for your favorite furniture

0,375 L	(Item Number) 200
0,75 L	(Item Number) 300
2,5 L	(Item Number) 500

The natural oils used for SAICOS Color Wax penetrate deeply into the wood and keep it elastic. Natural waxes protect the surface and ensure high durability and ease care. Perfect for children's toys and all wooden objects.

Ideal for restoring old furniture:

gives new life to surfaces, making them both resistant and easy to maintain.

SAICOS Color Wax is excellent for designing colourful wall surfaces and floors made of wood, bamboo and cork. On heavily used wood surfaces (e.g. flooring), we recommend using SAICOS Premium Hardwax-Oil as a final coating.

Clean & care of oiled wood surfaces

Regular damp cleaning

Wash Care Concentrate
removes normal dirt
of all wipeable surfaces
gently and thoroughly

Fields of application:

For all wooden and cork floors with waxed / oiled surface and all other floors such as PVC, linoleum, ceramic, tiles ...

Very well suited for laminate floors.

Also for furniture and other interior wood with waxed / oiled or lacquered surface.

Recommended application:

- » Dilute the concentrate with water (3 caps with approx. 5 l of water).

- » We recommend the application with *Ecoline Maintenance Set 8108Eco*.
- » Make sure that the wiping cloth is wrung out carefully to ensure **damp** cleaning.

- » Wipe dry if required.
- » To remove particularly stubborn stains, as well as for occasionally freshening and caring of **oiled** wood and cork floors, furniture and interior woods, we recommend our *Wax Care*.

- » Heavily worn down **oiled** floors can also be renovated with *Hardwax-Oil*.
- » Please consider our current technical data sheets.

Clean & care of oiled wood surfaces

Intensive cleaning

Magic Cleaner Concentrate
quick and intensive cleaning of
all heavily soiled and worn surfaces

Fields of application:

Intensive cleaning of all waxed, oiled or lacquered surfaces. Also for all other surfaces such as PVC, Linoleum, ceramic, tiles, natural stone ...

Easy removal of nicotine, grease and dirt films in bathroom and kitchen.

Recommended application:

- » Dilute the concentrate **1:10** with water (e.g. 0.5 l with 5 l of water).
- » Put the dilution evenly on the surface with our *Ecoline Maintenance Set*, wiper or cloth.
- » Do not pour on the surface and do not leave any puddles.

- » Allow to absorb for **5 - 20 minutes**.
- » Re-treat dried areas during this time.

- » Remove any loosened dirt thoroughly with a damp *Ecoline Maintenance Set*, clean wiper or cloth.
- » Wipe 2 - 3 times with fresh water and a damp cloth. Wipe dry.
- » Repeat the application if necessary.

- » Do not apply on untreated wood / cork surfaces, as this may hamper a subsequent coating.
- » Please consider our current technical data sheets.

Also available as ready-to-use spray.

Clean & care of oiled wood surfaces

Care & maintenance

Wax Care

removes stubborn stains,
protects and regenerates heavily used
wood and cork floors

Fields of application:

Especially for wooden and cork floors with waxed / oiled surface, as well as furniture (work and table tops) and other wooden surfaces.

Recommended application:

- » Clean the surfaces to be treated with *Ecoline Wash Care*.
- » Shake *Wax Care* well before use.

- » Pour the quantity of one cap (for approx. 1-2 m²) on the surface and spread evenly with *SAICOS Telescope-Maintenance Cloth (SAICOS Wax Care)* or *Ecoline Maintenance Set 8108Eco (Ecoline Wax Care)*. Alternatively the material can be spread evenly with a cloth when having small areas.

- » Allow to dry.
- » No visible contact points to non-treated surfaces.

- » Please consider our current technical data sheets.

Also available as ready-to-use spray.

Clean & care of oiled wood surfaces

Refreshing

Wash Care Oil
*maintenance of heavily used
wood and cork surfaces*

Fields of application:

Especially for oiled and waxed wood surfaces. Also well suited for furniture and other interior wood.

Recommended application:

- » Clean the surfaces to be treated with *Ecoline Magic Cleaner*.
- » Sand with a *green pad* if necessary.
- » Remove sanding dust thoroughly with a dry cloth and vacuum cleaner.
- » The wood surface must be dry and clean.

- » Before use, allow can to acclimate to room temperature and shake well.

- » Apply one cap (for approx. 1 m²) onto the surface.
- » Rub evenly with the *SAICOS Telescope-Maintenance Cloth* and let it dry.
- » Do not leave any puddles, to avoid an irregular surface.

- » Ensure that windows are open during and after application. Oxidative drying – ensure good ventilation.
- » Please consider our current technical data sheets.

Clean & care of oiled wood surfaces

Initial maintenance and renovation

Professional Care Oil
protects the surface of parquet floors
in residential and commercial areas

Fields of application:

For wood floors made of hard or soft woods, parquet, planks, wood block and industry parquet. Suitable for all European wood species, exotic woods and smoked oak.

Recommended application – repair & renovation:

- » Sand with a *green pad* if necessary.
- » Remove sanding dust thoroughly with a dry cloth and vacuum cleaner.
- » The wood surface must be dry and clean.

- » Shake well before use – do not dilute.

- » Apply thin and evenly once or twice with a white pad or cloth.

- » Ensure that windows are open during and after application for ventilation.
- » Please consider our current technical data sheets.

Clean & care of oiled wood surfaces

Repair & renovation of a coating

Premium Hardwax-Oil
restores the original properties
of oiled wood surfaces

Fields of application:

All kinds of indoor wood flooring: parquet, solid wood floors, strip parquet, veneer wood ...

All kinds of cork floors: parquet, cork tiles ...

Also for other high-wear wood surfaces: counter and table tops, furniture and other interior wood – also recommended for children's toys and other wood objects.

Ideal for use in rooms with high humidity such as bathrooms and kitchens.

Recommended application - Repair & Renovation:

- » Clean the surfaces to be treated with *Ecoline Magic Cleaner*.

- » The wood surface must be dry and clean.
- » Sand with a *green pad* if necessary.
- » Remove sanding dust thoroughly with a dry cloth and vacuum cleaner.

- » Stir well - do not dilute.
- » Apply thinly and evenly once or twice with a white pad or cloth.

- » Ensure that windows are open during and after application. Oxidative drying – ensure good ventilation.
- » Please consider our current technical data sheets.

Clean & care of lacquered wood surfaces

Care & maintenance

Ecoline Refresher Concentrate care and regeneration for lacquered SAICOS surfaces

Fields of application:

Especially for *Ecoline* lacquered flooring made of wood and bamboo. Also well suited for furniture and other interior wood (lacquered surfaces).

Recommended application:

- » Clean the surfaces to be treated with *Ecoline Wash Care*.

- » Dilute *Ecoline Refresher Concentrate* **1:10** with water (e.g. 0.5 l with 5 l of water).

- » Spread evenly on the surface with a damp wiper (*Ecoline Maintenance Set*).

- » Allow to dry.
- » Please consider our current technical data sheets.

Clean & care of lacquered wood surfaces

*renovation
and renewal*

Ecoline MultiTop Lacquer Polish
*for renovation and renewal
of your hard-wearing lacquer surfaces*

Fields of application:

Especially for *Ecoline* lacquered flooring made of wood and bamboo. Also well suited for furniture and other interior wood (lacquered surfaces).

Recommended application:

- » Shake well before use.
- » Clean the surfaces to be treated with *Ecoline Wash Care* or in case of heavy soiling / worn out surface, clean with *Ecoline Magic Cleaner*.
- » Sand with a *green pad* if necessary. Remove sanding dust thoroughly with a dry cloth and vacuum cleaner.

- » Spread even and sufficiently on the cleaned and dry floor with the *SAICOS Telescope-Maintenance Cloth* - do not process by machine.
- » Too little application prevents the smooth leveling. Avoid puddles, splashes and drops.
- » Spread evenly – do not polish.
- » Treat larger surfaces in sections. It must not have been dried between sections.
- » Last application should be done in direction of wood grain.

- » Please consider our current technical data sheets.

Clean & care of laminate, vinyl and design floors

Regular damp cleaning

Wash Care Concentrate
removes normal dirt
of all wipeable surfaces
gently and thoroughly

Fields of application:

Very well suited for regular cleaning of laminate, vinyl and design flooring. Also for all other wipeable surfaces such as PVC, linoleum, ceramic, tiles...

FAQ

You ask, we answer!

» ***Where can I buy SAICOS products?***

You can find our products in specialist shops or at various online suppliers. To find one of our partners, please use our dealer search.

» ***Why does the same transparent paint appear so differently in colour on different woods?***

The colour result depends on several factors: in addition to the wood type and texture, the wood sanding, for example, is also decisive. We recommend a trial coating on the original wood to get a precise preview of the later colour shade.

» ***Can I mix the colours with each other?***

Yes, the colours of the individual product families can be mixed with each other. (Please do not mix different product families with each other).

» ***What is the shelf life of the product?***

Please refer to our Technical Data Sheets for information on storage stability and shelf life.

» ***How economical are the colours?***

The coverage of a product depends on the wood type and the wood texture. For more detailed information, please refer to our Technical Data Sheets.

» ***What can I use to thin a product?***

Our coatings are ready to use and do not need to be thinned. However, if this is still desired, oil-based coatings can be thinned with our *SAICOS Brush Cleaner*. Water-based coatings can be diluted with water (with reservation only).

» ***How do I clean my tools such as brush, roller or paint tray?***

Water-based products can be washed out with water. Oil-based products are best cleaned with our *SAICOS Brush Cleaner*.

» ***Where does the smell come from when the oils dry? Do I have to worry?***

No, because our systems all have DIBT approval and are classified as harmless. During drying, a slight odour is produced by the natural substances used. Please ensure good air circulation during and after coating.

» ***The floor turned out too dark after the final coating. How can I make it lighter when the coating is already completely dry?***

Unfortunately, the floor has to be completely sanded and recoated.

» ***I have a floor with a bevel and would like to coat it with SAICOS Ecoline Oil Ground Coat. How should I proceed?***

Please precoat the bevels with the *SAICOS Floor Brush* and then level the coating with a white pad.

» ***The coloured primed floor has become stained after the application of SAICOS Premium Hardwax-Oil. What happened, what to do?***

In this case, the drying time of the primer was not observed or the climatic conditions did not match our recommendations. The floor must be completely sanded and then recoated. In this case, we recommend the use of the *2K Hardener Additive*.

» ***The SAICOS Premium Hardwax-Oil surface is not yet dry after the specified drying time. What should I do?***

The *SAICOS Premium Hardwax-Oil* will dry completely in any case. Make sure there is sufficient ventilation: Open all windows and doors. If necessary, a fan can be placed in the doorway.

» ***Is there a rule of thumb when a SAICOS Premium Hardwax-Oil floor can be walked on and when furniture can be placed?***

Drying depends on many factors such as ventilation and temperature, but usually takes between 3 - 5 hours. After 24 hours, the first furniture can be carefully placed. The surface is fully hardened after approx. 4 days. With the addition of *Hardener 2K*, the drying and curing time is shortened.

» ***I have roller marks after applying SAICOS Premium Hardwax-Oil. What should I do?***

In this case, the floor must be sanded and recoated after complete drying. If these are not too strong, you can also pad the floor marone, then polish on the *SAICOS Professional Care Oil* evenly and thinly with a white pad.

» ***If I use the Ecoline Oil Ground Coat, , how many coats of SAICOS Premium Hardwax-Oil or SAICOS MultiTop lacquer is needed?***

With the *SAICOS Premium Hardwax-Oil*, one coat is required. With the *SAICOS Ecoline MultiTop^{plus} System* it is 2 coats (with the varnish the surface must be sanded with a green pad after drying of the first lacquer coat).

» ***My floor is pre-oiled by the supplier. What do I use to apply a final coat?***

After previous cleaning sand with a green pad, roll on *SAICOS Premium Hardwax-Oil* once thinly or pad on *SAICOS Ecoline Hardwax-Oil* once thinly.

» ***Is the SAICOS Ecoline Oil Ground Coat a sole coat?***

No. *SAICOS Ecoline Oil Ground Coat* is not sufficient as a sole coat, as the pigments must be protected from running off. For the final coat we recommend *SAICOS Premium Hardwax-Oil*, *SAICOS Ecoline Hardwax-Oil* or our *SAICOS Ecoline MultiTop^{plus} Lacquer System* (sanding with green pad necessary).

» ***The coloured SAICOS Ecoline Oil Ground Coat has turned out too light. How can I make it darker?***

For a more intensive, darker result, you can apply the *SAICOS Ecoline Oil Ground Coat* a second time after it has dried completely or add up to 3% of the *SAICOS Ecoline Oil Ground Coat* to the *SAICOS Premium Hardwax-Oil*.

» ***Can I change the gloss level of SAICOS Premium Hardwax-Oil by polishing or similar?***

No. We offer 4 different degrees of gloss of our *SAICOS Premium Hardwax-Oil* in this respect.

» ***I don't like the gloss level of SAICOS Premium Hardwax-Oil. What can I do?***

Sand with a sanding grid or multi-hole pad and then roll on thinly again to the desired degree of gloss.

» ***What is the difference between SAICOS Premium Hardwax-Oil and SAICOS Ecoline Hardwax-Oil?***

The solids and solvent content as well as the method of application. *SAICOS Premium Hardwax-Oil* is applied twice thinly with the oil/wax roller. *SAICOS Ecoline Hardwax-Oil* is applied twice with a single-disc machine using a white or beige pad.

Our application advice is given to the best of our knowledge and based on experiments, but should only be treated as a non-binding guide. You must still check that the products delivered are suitable for the intended purpose. As we have no control over the application and processing of our products, the user bears full responsibility. The previous product informations shall be deemed invalid following publication of a new brochure. Changes reserved. All images of our product colour palettes are non-binding and may deviate from the original colour.

For more information, please read our current technical data sheets. The protection of your personal data is very important to us. You can find our privacy policy on www.saicos.de.

Care instructions for sealed parquet and wood flooring in accordance with DIN 18356. To ensure a good atmosphere in the room and to preserve your wood floor, we recommend a room temperature of 20-25 °C and a relative humidity of 55-60%. For more information, please read our current technical data sheets.
