

Green-Ex Concentrate

Technical Data Sheet

June 2022

Page 1/1

- » *removes green-growth from all exterior wood also from natural and artificial stone terraces, steps and gravestones*
- » *cleans self acting*
- » *prevents new growth*

Product characteristics:

SAICOS Green-Ex is an effective, biological concentrate for the easy removal of green growth and similar infestation. It is self-acting, gentle but thorough. Prevents new growth. Use biocides safely. Always read the label and product information before use.

Article number:

8120

Fields of application:

For all outdoor materials: wood, stone, concrete, cement, roof tiles, aggregate concrete, sand-lime brick, ceramic, tiles, clay, plastic, glass, paints and varnishes...

Also for coated / uncoated outdoor wood: wooden decking, garden furniture, pergolas, trellis, fences... (without damaging the finish)

Preparation:

Remove coarse dirt (broom or brush). Protect metal (f.i. fittings) with masking tape. Cover plants with foil. Protect clothes. Surface should not be wet. Dilute with water up to 10 parts, depending on degree of green growth infestation (can also be used undiluted if heavily soiled).

Processing:

Apply with watering can, garden sprayer or [SAICOS Flat Brush](#). In case of small areas e.g. garden furniture let act for approx. 1 hour and wipe off or rinse afterwards with water. Product can be used concentrated if the surface is heavily soiled. Just apply in case of larger areas e.g. decking – no rinsing necessary. Procedure can be repeated, if green growth remains after first cleaning.

Best processing temperature:

Between 8° C und 25° C. Just apply on frostfree surfaces.

Coverage per liter:

1 liter is sufficient for 50 – 100 m² (dependant on dilution and infestation).

Number of treatments:

1x; in case of heavy infestation 2x

Drying time:

Dependant on weather condition; dries as usual wet surface. If subsequent coating is desired, surface must be completely dry.

Easy maintenance:

Procedure can be repeated any time in case of new infestation.

Cleaning of tools: Thoroughly with plenty of water.

Storage: At least 2 years in closed container.

The liquid product is not susceptible to frost.

Physical characteristics:

Density: 0,9 - 1,03 g/cm³

Flashpoint: not flammable

Safety instructions – first aid:

Keep out of the reach of children. Do not fill into food, beverage or other containers used for foodstuffs. Do not bring into direct contact with plants such as lawn, may cause bleaching.

Our application advice is provided to the best of our knowledge and based on experiments, however, applies only as a non-binding recommendation and does not exempt you from testing the products supplied by us as to their suitability for the intended purpose. Since the application and processing of the products is beyond our control, the responsibility rests solely with the user. With publishing a new technical data sheet the previous loses its validity.
